

# Inria Spinoffs since 2005

10-06-25

*Inria*

Nom	Activité*	Date création
ABILOUS	Educational tool that makes learning fun and motivating	2025
AUGUR	Accelerating Physical Simulations to Improve Engineering Designs	2025
DYJEST	Precisely identify to permanently change the behaviors that cause or accentuate irritable bowel syndrome	2025
EBIOSE	Autonomous factory of artificial intelligence	2025
LABEL4AI	High-quality data labeling for AI applications	2025
LIBSCIENCE	A new model of scientific publication with a more suitable and fairer structure to serve the research community	2025
LPRINT	3D printer for PCB (Printed Circuit Board) manufacturing	2025
NAUTIA	Artificial intelligence applied to yachting	2025
AFOODI	Allow restaurants to earn more by polluting less	2024
CAPE	Collaborative and dynamic secure networks in the form of Network-as-a-Service (NaaS)	2024
CATS AND FOXES	Life simulation game	2024
COMPLIANCE ROBOTICS	Deformable robotic conveyor that combines the advantages of pick & place robots and conveyors	2024
DAHU ROBOTICS	Stairlift without installation	2024
DAREWIN EVOLUTION	Selection of microalgae strains	2024
HAMMURABI	Innovative AI for legal professions	2024
HOPE VALLEY AI	Informed Health Monitoring Solutions	2024
MYODEV	Muscular rehabilitation by connected and gamified object	2024
PHYSIGHT	Augmented Brain Monitoring for General Anesthesia	2024
PONTOS	Information and Data Provided to Local Fishing Communities to Carry out an Eco-responsible and Commendable Activity	2024

<b>SHOTAM</b>	Virtual Reality Techniques Applied to the Performing Arts	2024
<b>URDONE</b>	Transformation of Heterogenous Data for Enterprise Applications	2024
<b>VCAST</b>	Transparent Electronic Voting Solution	2024
<b>ABBREVIO</b>	Platform for aggregating public procurement offers, with analysis, classification and recommendation by AI	2023
<b>ARRANDI</b>	Identification and assistance in responding to calls for R&D projects	2023
<b>AUTOMATIKA ROBOTICS</b>	Software infrastructure for general purpose robots to intelligently comprehend space and human behavior and safely collaborate with humans in all kinds of environments.	2023
<b>CO-IDEA</b>	Immersive and collaborative experiences for training and meetings	2023
<b>DENERGIUM</b>	A Three Step Optimization for HPC-AI center trough a software dedicated to understanding how applications are using energy and how to optimize it. To do so, a tree step approach: Measure, Understand, Optimize.	2023
<b>DYNALIPS</b>	High Realistic Lip Synchronization For 3D Animated Characters	2023
<b>EVE EVOLVING EDUCATION</b>	A platform to develop modern surgical education	2023
<b>MATRICIS.AI</b>	Deep learning for women's health	2023
<b>OPERYS</b>	Operry aims to resolve the malfunctions on construction sites such as incomplete, ambiguous or late information	2023
<b>PREDITWINS LAB</b>	Musculoskeletal system replicas for training, matches or reathletics to maximize the availability and performance of athletes.	2023
<b>PROBABL</b>	Open-Source Commons for AI, Machine Learning, and Data Science	2023
<b>SKYLD</b>	Protection of AI models from reverse-engineering.	2023
<b>SONAIDE</b>	Remote assistance devices	2023
<b>STACKEASE</b>	Optimal Use of Grid-connected Batteries	2023
<b>TWINICAL</b>	Oncologic surgical care with Digital Twins	2023
<b>AXIOME EDUCATION</b>	Edtech focusing on math teaching	2022
<b>BITS2BEAT</b>	Predictive diagnostic assistance based on heart rhythm analysis	2022

<b>CYBI</b>	Detection of potential cyber-attack routes and automatic generation of barriers to put in place in order to block them	2022
<b>DASPREN</b>	Detection of pure zero-day ransomware attacks with no history	2022
<b>DEEPHAWK</b>	AI for Visual Quality Control	2022
<b>ENHANCE LAB</b>	Machine learning combined with physical models of image formation and optimization: joint demosaicing, denoising, super-resolution and HDR imaging from raw image bursts.	2022
<b>MANIKINMATE</b>	Echogenic and radiopaque anatomical mannequins	2022
<b>NIJTA</b>	AI-powered Speech Anonymization	2022
<b>PULSE AUDITION</b>	Intelligent audio glasses to hear in noisy environments.	2022
<b>QAIRNEL</b>	Qairnel aka Docteur Memo, born at the Brain Institute in Paris, brings together all the skills to take care of, support and help those who are worried about their memory or that of a loved one	2022
<b>QATENT</b>	Qatent helps IP professionals draft quality patents more quickly using artificial intelligence	2022
<b>SOFIA (AKA LOUISE)</b>	Leveraging advanced technology and genetic insights to provide healthcare providers and researchers with actionable data and innovative therapeutics for higher success rates in fertility	2022
<b>WE DO LOW</b>	Optimization of C/C++ embedded applications	2022
<b>AVACAR</b>	Enabling remote driving for vehicle fleets	2021
<b>CODE IS LAW (aka ALIAS)</b>	A decentralized authorization management technology enabling to scale data portability through smart contracts and simple legal user experiences	2021
<b>CRYPEN</b>	Formal verification tools and mathematically proven software for security-critical systems.	2021
<b>FLITSPORT</b>	Optimization of sports training plans by fusion of training data and cardiac monitoring	2021
<b>GREENFARM ROBOTICS</b>	Tractors 2.0 - Suspended robots for agriculture	2021
<b>NAIMROD</b>	Shortcut in language learning	2021
<b>NEURODEC</b>	Analysis of neuromuscular signals for upper limb prosthetics	2021
<b>QIRINUS</b>	Secure deployment of cloud infrastructure	2021

<b>REBRAIN</b>	RebrAI offers precise targeting in Deep Brain Stimulation thanks to an AI algorithm and a collaborative register of health data.	2021
<b>TERRIFLUX</b>	Modeling and representation of supply chains and value chains of economic sectors at national and sub-national scales	2021
<b>AI VERSE</b>	AI Verse develops a new technology to efficiently train your Deep Learning networks and create the next generation of vision-based applications	2020
<b>ALICE &amp; BOB</b>	Design of quantum computing, based on "Schrödinger qubits".	2020
<b>COALT / PRESSMIUM</b>	A Netflix for online news	2020
<b>CODAXIS</b>	Analysis and cartography for software audit and maintenance	2020
<b>GAZOUYI</b>	Educational tools and activities to support the awakening of children	2020
<b>MALIZEN</b>	Fusion of the latest advances in data visualization and analysis to strengthen cybersecurity.	2020
<b>TESSAEL</b>	A geologic meshing company, in the different stages from exploration to production.	2020
<b>ATOPTIMA</b>	With its expertise in mathematical optimization, Atoptima provides decision support tools. Its software solutions take the form of bespoke Software-As-A-Service, adapted to the problem of dynamic planning of operations and vehicle routes of an organization.	2019
<b>CRYPTONEXT</b>	CryptoNext Security offers B2B software that can now protect sensitive data against quantum threats. The software, easily integrated into a security product, combines current cryptography standards with a selection of future quantum computer resistant cryptography standards.	2019
<b>DIAGRAMS TECHNOLOGIES</b>	A software publisher dedicated to industrial predictive maintenance, DiaGRAMS Technologies enables technicians to anticipate breakdowns and malfunctions on its fleet of machines. The company puts AI at the service of industry with its monitoring solution that leverages existing data and eliminates the need to add sensors.	2019
<b>LEFTANGLE</b>	Left Angle is developing a brand-new software dedicated to Motion Designers and visual effects artists. It allows you to create more quickly while keeping control over your workflows, to collaborate in teams and to easily produce complex images.	2019
<b>MARNADIL</b>	Le Chemin Des Mûres is reinventing the logistics of transporting local products: through a co-transport application, it finds and organizes on the fly the most efficient pooling of tours between local players.	2019
<b>MUMPS TECHNOLOGIES</b>	Mumps Technologies conducts R&D, consulting and training activities around Mumps, a free software that it distributes that solves large hollow linear systems.	2019
<b>PLUTON.AI</b>	Pluton AI combines cutting-edge artificial intelligence algorithms and technologies in fields like natural language processing, and large-scale graph analysis.	2019
<b>STATINF</b>	StatInf offers a design support tool for critical embedded systems accelerating the adoption of new generations of processors, in complete safety. The underlying technology is based on a statistical model of interference that facilitates the distribution of programs on the processors and ensures their proper functioning.	2019

<b>TOUCH SENSITY</b>	Touch Sensity makes rigid, flexible or liquid objects and materials sensitive to physical interactions. The non-intrusive technology makes it possible to retrieve data from the pressure, extension and deformation exerted on a material, while respecting its topology and without using sensors.	2019
<b>WATTSON ELEMENTS</b>	Wattson Elements is developing Falco, an Internet of Things solution to help marinas improve performance and attractiveness.	2019
<b>XSCALIBUR</b>	XScalibur offers a visual software solution to facilitate the understanding and implementation of digital cloud systems, measure the costs and the environmental impact of the use of digital technology in order to enable the creation of efficient and eco-responsible information systems.	2019
<b>DENIMBO</b>	Denimbo is a publisher of software development tools for the Internet of Things. The solution allows generalist developers to control agile development and the evolutions of their business application from end to end, thanks to a homogeneous environment adapted to connected objects, cloud services and mobiles.	2019
<b>DILEPIX</b>	Dilepix offers farmers who equip their fields and livestock buildings to automatically analyze surveillance images and alert them if necessary, particularly in the event of climatic disturbances.	2018
<b>NEURINNOV</b>	Neurinnov designs and develops new generation active implantable medical devices. It has implemented a patented generic neurostimulation technology in order to provide answers to several families of severe functional impairments without a therapeutic solution. The first application targeted is to restore the functionality of the hand to make it autonomous.	2018
<b>NUREA</b>	Nurea develops decision support and implant customization software for cardiovascular and thoracic surgery (eg: aortic endoprotheses, trachea implants, etc.).	2018
<b>ONEANGSTROM</b>	OneAngstrom develops and markets SAMSON, the integrated molecular modeling platform.	2018
<b>UT4H</b>	UT4H offers a complete connected solution to simplify and facilitate the daily life of seniors living alone, relatives and professional caregivers. Via connected objects at home linked to a secure health data platform, the Home-Assist solution intervenes in all areas of autonomy.	2018
<b>BIOMATHEMATICA</b>	Biomathematica deciphers the invisible world of microorganisms thanks to new high-throughput genetic sequencing technologies and advanced bioinformatics and mathematical techniques. Biomathematica makes it possible to understand, analyze, monitor, track down, control, modify and optimize the microbiome - human, environmental, artificial - from a sample: from the genome to the microbiome.	2018
<b>CYBER-DETECT</b>	Cyber-detect offers a cyber security solution based on morphological analysis to detect malicious code and analyze similarities between programs.	2017
<b>CASE LAW ANALYTICS</b>	Case Law Analytics uses artificial intelligence to model the judicial decision-making process and provide legal risk quantification tools for legal professionals in SaaS mode.	2017
<b>EKINNOX</b>	Ekinnox is developing a 3D video gait analysis system for nursing staff in rehabilitation establishments (doctors, physiotherapists) for diagnostic aid and follow-up of the care pathway.	2017
<b>ENANCIO</b>	Enancio empowers biologists to focus on their core business by freeing them from the tedious tasks of storing and processing their big data and by facilitating the integration and organization of their workflows. To do this, the company offers hospitals and genetics laboratories and R&D teams a platform for the diagnosis and prognosis of diseases made from the analysis of genomic and protein data.	2017
<b>GO TOUCH VR</b>	Go Touch VR designs haptic interfaces for virtual or augmented reality systems. The company has developed a portable device equipped with one or more "rings" allowing the texture and shape of virtual objects to be touched and felt in an unequalled way.	2017

<b>INHEART</b>	Inheart provides a toolled service for cardiologists that allows them to plan and guide their catheter ablation intervention thanks to the real-time visualization of their instruments within a personalized virtual heart, reconstructed from patient images. or the patient.	2017
<b>MARS:HELLO!</b>	Mars:Hello! offers a web coordination service between office and field actors for dealing with unforeseen events in the monitoring of a planned operation.	2017
<b>OPENAGORA</b>	Open Agora offers companies tools that facilitate collective decision-making (discuss, vote, decide). Today, the company offers a comprehensive and easy-to-use voting app in the Slack environment. It also offers an API which constitutes a software toolbox for determining and analyzing a collective opinion.	2017
<b>RYAX TECHNOLOGIES</b>	Ryax Technologies offers a resource and calculation management solution for IoT applications in hybrid Edge / Fog / Cloud Infrastructures.	2017
<b>STARBURST COMPUTING</b>	Starburst Computing develops and sells a software solution allowing and facilitating the interconnection of "intelligent" devices (computers, tablets, smartphones, etc.), in particular for video games. Thus, in a racing game, the smartphone becomes a rearview mirror while the tablet turns into an interactive map, all with just a few clicks.	
<b>SYLHA</b>	Sylha is an alternative to the contactless credit card, materialized by a connected coin. It is with a view on the development of a united society that the young start-up has chosen to donate transaction costs to associations rather than to financial institutions. The citizen then decides, through his or her payment, to which local project he or she wants to transfer them to the democratic platform for the financing of society.	2017
<b>THERAPANACEA</b>	Therapanacea is developing new generation software incorporating artificial intelligence building blocks to support medical teams in diagnosing radiation therapy treatments against cancer. The company's vocation is to revolutionize the fight against cancer, by increasing the precision of existing techniques for better survival and safety of patients.	2017
<b>AMBICITI</b>	Ambiciti provides street-by-street levels of air and noise pollution. Numerical simulations and stationary and mobile observations are exploited together to provide the best possible information anywhere in the world. The Ambiciti mobile application offers everyone a follow-up of their exposure to pollution, and the possibility of contributing to the observation of the environment.	2017
<b>ANTESCOFO</b>	Antescofo offers mobile applications for all music lovers to rediscover the pleasure of playing music together. Its technology equips a computer, smartphone or tablet with musical artificial intelligence, allowing it to accompany musicians, as an accompanist or an orchestra would. It is the accompaniment that adapts to the performer and an unprecedented interaction is then created between the performer and the playback recording that works on all styles and instruments.	2016
<b>IEXEC</b>	iEx.ec provides a fully decentralized cloud platform based on blockchain technology. The company is developing a marketplace without trusted intermediaries that allows IT resource providers to directly monetize their servers, applications or datasets directly on the blockchain.	2016
<b>INALVE</b>	Inalve industrializes an innovative process for producing microalgae on a mobile support, and develops ingredients rich in proteins for the animal feed and aquaculture market in particular.	2016
<b>LYBERO</b>	Lybero.net is making organizations immune to data leaks with the widespread use of encryption. The start-up simplifies the use, deployment and management of cryptography. The first product of Lybero.net is a pure web encrypted file transfer software, without password exchange and with an original function of recovery of exchanges via a quorum of secret administrators.	2016
<b>MATRIX LEAD</b>	Matrix Lead allows you to develop reliable and powerful spreadsheets, and to better use complex spreadsheets to reduce the cost of development and	2016

	management. The company also provides business services that include software integration and scaling of their spreadsheets.	
<b>OPENSQUARE</b>	Opensquare is a human resources consulting firm specializing in conducting internal company surveys. Based on automatic language processing techniques, the company implemented a solution for analyzing textual responses to open-ended survey questions.	2016
<b>POLLEN ROBOTICS</b>	Pollen Robotics is developing a set of technologies allowing robots to enter the domestic world and facilitate their appropriation by the general public. The start-up is particularly interested in the fun and educational uses of these technologies to promote learning in digital sciences.	2016
<b>REALITYTECH</b>	RealityTech presents collaborative augmented reality technology. Its projection platform makes any table interactive; the physical objects present are then increased. The user experience is enriched by contact with these new qualities and modalities of action, enough to imagine all kinds of uses: new board games, educational applications or innovative interactive product presentations.	2016
<b>REDANT LABS</b>	Redant Labs is a young company specializing in IT consulting and development. Focused on research and development, the company offers solutions in various fields of computing, in particular bioinformatics.	2016
<b>SITU8ED</b>	SITU8ED models the behavior of smartphone users with the strictest respect for confidentiality. Our analytics provide precise targeting to so-called Drive-to-Store advertising campaigns, advertising that entices targeted people to shop through promotional ads.	2016
<b>TALER SYSTEMS</b>	Taler is developing a socially responsible electronic payment system that respects the anonymity of consumers while ensuring that the revenues accumulated by merchants are justifiable for government authorities.	2016
<b>ALERION</b>	Alerion offers intelligent solutions by and for drones, designed or adapted to demand by an assembly of cyber-physical bricks that are safe in terms of both security and operational safety.	2016
<b>ANATOSCOPE</b>	Anatoscope is a software solution that allows you to build and simulate 3D digital avatars from medical imaging, with the same biomechanical characteristics as the real person. The avatar makes it possible to model musculoskeletal and dental pathologies, to virtually test personalized treatments before applying them to the patient themselves and to produce prostheses.	2015
<b>AUTOKAB</b>	AutoKAB offers public transport operators kits designed to improve the operation of their fleets by using assisted or automated driving technologies.	2015
<b>IQSPOT</b>	iQSpot offers a software platform specializing in intelligent building management to reduce the energy bill of tertiary buildings thanks to the involvement of occupants. This platform, available in the cloud, allows the connection and full interaction of all components of a building's ecosystem.	2015
<b>LAMARK</b>	Lamark specializes in the recognition and interpretation of images. In particular, it markets Lamark-Metadata, which is a web platform that simplifies access to digital image metadata.	2015
<b>MAKITOO</b>	Makitoo offers a real-time bug repair solution for mobile and PC applications.	2015
<b>MEDIEGO</b>	Mediego democratizes online personalization and anticipates the desires of Internet users of any website - online publishing, ads, comparators, e-commerce, with personalized recommendations. Mediego is easy to set up, real time and relevant from the first visit.	2015
<b>PIXYL</b>	Pixyl is providing medical research with a new IT solution to make the most of the information contained in brain MRIs. This solution has the particularity of locating, identifying and quantifying, from MRI sequences, several types of brain lesions linked to different pathologies.	2015

<b>REGAIND</b>	Automatic photo sorting solutions for the general public. In addition to analyzing the content of the photos, Regaind allows, depending on the desired uses, to identify the most beautiful photos or to produce a summary.	2015
<b>DEEPOMATIC</b>	Solution based on deep learning to identify e-commerce products in web and mobile images and thus monetize these images.	2015
<b>NEOSENSYS</b>	Video intelligence solutions for mass distribution to better understand consumer behavior on the shelves and thus improve the efficiency of merchandising strategies	YUIOP
<b>XTREMLOGIC</b>	Solution aiming at democratizing high performance computing by generating algorithm libraries. The performances of these algorithms are accelerated thanks to reconfigurable integrated circuits called FPGAs.	2014
<b>YOGOKO</b>	Innovative communication solutions specifically adapted to equipment deployed remotely in the field of transport and mobility of goods and people (suppliers and managers of road infrastructure, street furniture, vehicles).	2014
<b>CRYPTOSENSE</b>	Application security software dedicated to the detection and correction of cryptographic vulnerabilities.	2014
<b>INSIMO</b>	Development of medical simulation software allowing surgeons to learn about virtual anatomies.	2013
<b>MNEMOTIX</b>	Knowledge engineering and semantic web services.	2013
<b>SYNECTIQUE</b>	Software suite for the maintenance, evolution and migration of a company's applications.	2013
<b>R3LOAD</b>	API for adding real-time voice, video and messaging components to VoIP, web and mobile applications.	2013
<b>THERAPIXEL</b>	A solution for viewing medical images in the operating room, Therapixel offers surgeons an interactive solution for viewing and analyzing medical images in the operating room, ensuring complete sterility of use without contact.	2013
<b>AXELLIENCE</b>	Development of software solutions improving the productivity of developers.	2013
<b>MENSIA TECHNOLOGIES</b>	Applications of real-time quantitative neurophysiology for the medical market. Exploitation of recent advances in the understanding of the brain to create revolutionary devices to assess and improve cognitive abilities and treat certain diseases of the brain.	2012
<b>ALIEN</b>	Engineering around model-free control and algebraic estimation.	2012
<b>ALPHABILITY</b>	IT solutions for financial engineering.	2011
<b>AMBIENTIC</b>	Publishing of software in the field of cooperative mobile applications.	2011
<b>HIKOB</b>	Next-generation, wireless, autonomous and scalable instrumentation systems for capturing information related to an environment and physical resources and for routing it to an information system.	2011
<b>LIXOFT</b>	Population analysis solutions in preclinical and clinical trials, pharmacovigilance and pharmacoepidemiology.	2011
<b>OCAMLPRO</b>	OCamlPro provides services and tools for the rapid development of high-quality software. Its expertise in the OCaml language, in the application of formal methods and tools for analysis, optimization and code verification	2011

	allows it to develop its activity in all areas where code correction, high availability or security are important issues.	
<b>TOCEA</b>	Publisher of software solutions dedicated to continuous monitoring and risk reduction in application development.	2011
<b>KARRUS</b>	Expert in traffic engineering (traffic monitoring and management tools), sensor network and numerical calculation	2011
<b>LYATISS</b>	Software publisher specializing in cloud network control: intelligent cloud network orchestration system for the construction, control and optimization of virtual datacenters and cloud infrastructures.	2010
<b>POWEDIA</b>	Online automated video production platform for Web, IPTV and Connected TV.	2010
<b>ROBOCORTEX</b>	Use of image analysis software designed for real-time robotic vision and based on "robust" algorithms.	2010
<b>SCILAB ENTREPRISES</b>	Official publisher and exclusive service provider of Scilab software.	2010
<b>SYSFERA</b>	Editor of innovative software (open source and proprietary) to simplify access to applications and computing resources.	2010
<b>ANTELINK</b>	Software publisher specializing in software lifecycle management and Open-Source component detection.	2010
<b>HARMONIC PHARMA</b>	Technologies to identify and patent new applications of existing drugs.	2009
<b>SYNEIKA</b>	Neuro navigator for transcranial magnetic stimulation	2009
<b>VERBATIM ANALYSIS VERA</b>	Automatic analysis of answers to open questions in opinion surveys.	2009
<b>GOLAEM</b>	Golaem makes it easy and affordable to populate worlds with directable digital characters, from a few to thousands. Artists from all over the globe use Golaem to bring life to commercials, episodic productions, feature films and games.	2009
<b>HILABS</b>	Development of turnkey systems for dynamic and interactive display of information on shop windows.	2008
<b>SENSEYOU</b>	Design and implementation of innovative services, based on diffuse computing, to make the environment intelligent.	2008
<b>SAILENDRA</b>	System of recommendations based on behavioral analysis.	2008
<b>VEKIA</b>	Software for ecommerce.	2008
<b>4D VIEW SOLUTIONS</b>	3D modeling systems for dynamic real scenes.	2007
<b>ACTIVEEON</b>	Open-source solutions for distributed and parallel computing to accelerate applications and virtualization.	2007
<b>INTUITIVE MACHINE</b>	Voice-based personal assistant service.	2007

<b>MOVE &amp; PLAY</b>	Content management system for individuals.	2007
<b>MILPIX</b>	Visual search software solutions and media monitoring services.	2007
<b>REALTIME-AT-WORK</b>	Solution for developers of real-time applications aimed at optimizing the use of execution platforms while verifying operational safety constraints.	2007
<b>SCALABLE GRAPHICS</b>	Parallel rendering software and services for 3D visualization applications.	2007
<b>SIDERION TECHNOLOGIES</b>	Publisher of application telephony solutions and intelligent routing of telephone calls.	2007
<b>TECHNOSENS</b>	Communication tool allowing people with loss of autonomy to stay connected with their social environment.	2007
<b>KERLABS</b>	Linux PC cluster management solution.	2006
<b>SEDA</b>	Publisher of info-mobility services for road operators and equipment manufacturers.	2006
<b>VULOG</b>	Carsharing software and services.	2006
<b>CETOINE</b>	Evolutionary production studio for images, videos, textile and decorative designs.	2005
<b>COYOTE SOFTWARE</b>	Creation and development of video games.	2005
<b>EVODIA</b>	Online and offline handwriting processing software publishing.	2005
<b>KEENEO</b>	Software editor for behavior recognition and Intelligent Video Surveillance (VSI).	2005
<b>RT CONSULTANTS</b>	Services in ergonomics and human factors applied in aeronautics and information technologies	2005
		2005

\* The description corresponds to the startup activity at the time of incorporation
